

Downlights are popular for many good reasons, but we inherit costly consequences if they are EXPOSED in our ceilings...

Fit **ISOLITE™** Guard *without* delay.
Then relax with all the benefits.

Who can afford anything less?

SO many reasons to fit

Comply to Australian Standards ...easy

- Fully Approved FIRE RESISTANT ENCLOSURE

Prevent Ceiling Fire Devastation

- Smoke alarms & insurance don't do this... EXPOSED halogen downlights are a major fire cause*. Isolate hi-temp parts from timber, insulation, build-up and interference *without* delay (see hazards diagram on left).

If that's not enough...

Prevent Loss of Vital Insulation Values/Benefits

- Allows you to avoid big insulation clearance requirements and **shocking energy waste***
- Avoid breakdown of noise barrier (acoustic rated).
- Stop *additional* heating and cooling loss in living areas by sealing off vented downlights.

Prevent 24/7 Indoor Pollution Thru Downlights

- Keep out dust, allergens and all sorts of insects (a breakthrough for allergy/asthma sufferers).

A vital investment that will pay for itself in energy savings alone.

Frequently asked questions

- Q** Can loose fill insulation be used with Isolite™?
A Certainly, if installed according to instructions.
- Q** Will the sealed Guard get too hot?
A No. Isolite™ is made of hi-temp fire resistant polymer, and correct installation, including insulation, produces a safe-touch temperature.
- Q** Will Isolite™ reduce average halogen globe life?
A No; this has been proven by time and testing.
- Q** Can Isolite™ be used with 240V GU10 fittings?
A Only if 240V modification instructions* applied.

Why the Transformer Isolator for 12V?

It restrains insulation *and* allows 100% transformer ventilation for best downlight performance.

It allows high insulation cover and benefits.

For a safer, tidier ceiling with transformer mounted over a non-combustible surface.

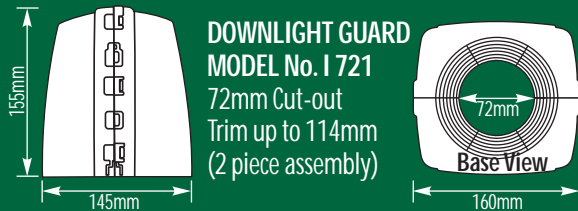

Complete Isolite™ assembly with Transformer Isolator for a totally transformed downlight

You can't afford anything less

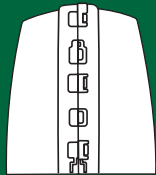

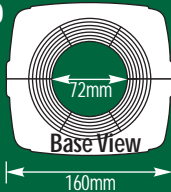

Isolite™ Guard can be used with:

- ✓ Most good quality 12 volt downlights up to 50w maximum with a detached transformer and 200mm minimum length globe holder leads.
- ✓ Downlights with a spring clip span under 180mm when installed.
- ✓ Above ceiling access. (If this is a problem call 1800 852 741 for free advice or other options).

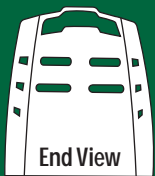

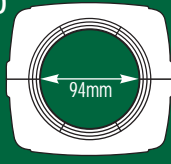

Note: As lighting equipment used with Isolite™ is a variable beyond Arrowform's control it is the responsibility of the customer to select quality compatible light fittings. Isolite™ is guaranteed to be free of defects in material and workmanship for 12 months from the purchase date.

**DOWNLIGHT GUARD
MODEL No. I 721**
72mm Cut-out
Trim up to 114mm
(2 piece assembly)

**DOWNLIGHT GUARD
MODEL No. I 941**
94mm Cut-out
Trim up to 114mm
(2 piece assembly)

**TRANSFORMER ISOLATOR
ACCESSORY No. I TMI**
Suits I 721 & I 941
(1 piece)
